- **Software:** Photoshop, Photoshop XD, Visual Studio, and Oracle SQL Developer
- **Other:** WordPress, IoT, Git

ACADEMIC PROJECTS

Market Edge (PHP, Bootstrap 4, Ajax) – 01/2019 – 04/2019

- Developed a stock market portfolio management website with PHP. The web app is capable of storing users in the database and build their portfolio through available stocks and add it to watch list. It can also view history of stock in nicely formatted chart and displays all the useful information about the stock. The project is very database and API driven. To learn more, please visit my site.

Hospital Redesign (ASP.NET CORE 2.0) – 01/2019 – 04/2019

- In this project we work in a group and redesign a hospital website that is been assigned to us. Each of us is responsible to do 3 features each. One of the feature I've done was Plan Your Stay. It helps clients to plan their stay in the hospital for instance they can buy Wi-Fi, TV or whatever the hospital service offers. Clients can edit and cancel bookings as well as the admins. To learn more, please visit my site.

EDUCATION

Web Development

Humber College School of Applied
Technology, Toronto, ON
2019
